

MILITARY GUARD

As Demanded by the Infamous Elder Hicks.

Says the Charges Against Him Are Untrue.

Elder Hicks, the Indiana man who is charged with unseemingly and seducing a girl named Puckett, says, in a letter to Sheriff Stephens, of Hancock county.

Blanco, Ky., June 24, Hon. Sheriff Hancock Co., Ky.

Dear Sir—John Hicks tells me that "you are a man of a woman in a few days and full of trouble," but whatever may be the condition of excited and misguided men, nothing will take the place of facts.

I have been reading the accounts as they appeared in the dailies and weeklies of the state and the country, of the terrible misadventure, hypocritical, which I read to your county some time ago, I came to the account of "Elder W. M., or W. H. Hicks making a specialty of mesmerizing young country maidens, and seducing them."

Now, as an officer of the common law and a man of intelligence, know that such a statement is entirely untrue. I am not a "mesmerist."

"Mesmerism!" "Hypnotism!"

Shades of the Holy Father! There is not a truth in the whole thing.

I am the man who presided at the trial of John Hicks, and who had been lured back for a falsehold and had been lured, issued against me and the threats of unliking and unreasoning mob of wild men.

I was at John Puckett's house, talked to Miss Lida, his daughter, and was accused by Lida Curry of being criminally intimate with Miss Puckett etc., but I never owned nor did I wish to own anything wrong in my presence at any time, and I believe that she has ever gotten out of the way with any person at any time.

I can easily interpret the whole thing, I think, however. There are some things under a "hood-wink" of duped of youth, and in my judgment, under influences were made to operate on the mind of Mr. Puckett's family to induce the statement as published in the Louisville Post at Popul Journal.

I know no more about mesmerism than a hog knows about picking a battle, nor do I believe there is a man or woman who can seduce women by mesmerism.

I did not leave Hancock because I felt condemned, or guilty, or I felt anything, and I am proud to go back and face a court of competent jurisdiction on the face of the "Mesmerist" charge. I repeat, I cannot believe Lida Puckett ever came to me as a man, and as far as the Curry girl is concerned, her very image is a refutation.

Elder Coleman met me six years ago at Magan, and I did some work in his country, as also around Fordville.

You see a man is a simple one, and W. M. Hicks was a most convenient man. There is a W. M. Hicks, who is a Baptist Minister, and he has been in plenty of places and he is well known, hence his name at the trial named him as Mr. Hicks. My own name is Mr. Hicks, and my identity, as a man, is known to all.

Now I write to you, Mr. Sheriff, as I direct, and if you will give me the privilege of military protection, as per my right, I will come to Louisville, and would very much like to do so, for the sake of vindicating an innocent, but over-persuaded family.

If you prefer to let me go, my apprehension independent of a correspondence, I have no objection, but I can save you, dear sir, both time and money. If you will write to No. 10, Lexington, Ky., Chicago, Ill., I will get the letter.

My offer is this—I want my absolute guarantee of my rights so far as protection is concerned, that is all. What I do not want is a man's money nor did I demand any man's home.

I think will of the Mr. Hicks people and I hope they will just think a little of me.

Glendene People Get What They Want After a Conference.

The citizens of Glendene are the most independent and practical people in Breckenridge county. When they set their heads to doing a thing and they have good reasons for it, they do it.

Not long ago they got their backs up over the way in which the roads were being worked in their district. The people in the neighborhood were not in their time and labor improving at all already good road in the Robinson neighborhood and they neglected to put the most impassable hill at Glendene on any thing like the order.

The citizens and tax payers grumbled and some of the more hot-headed spoke of putting dynamite under the road machine and blowing it up.

Superintendent H. Pate heard of the ill feeling and went to Glendene to confer with the citizens and find out the true state of affairs for himself. He found that the people in that hilly town were justified in the stand they took and he showed him with the stand.

He made the proposition that if they would assist him he would see that the bill was put to permanent repair. They acquiesced and donated the use of their teams and labor for several days. Mr. Pate then made preparations to metal that portion of the road and now it is being put in the shape.

The improvement will result in great good for Glendene and it shows what reason and enthusiasm can do.

It also proves that a great deal of the opposition to the good roads movement is unnecessary and that the people can get what they want if they go after it.

A Bright Woman's Remedy For a Pile of Peats.

A plague of small ants is worrying the good house-keepers in the lower part of town. The little pests get in the sugar bowls, play havoc with cakes and pies and devour themselves in the jelly and fruit preserves.

It is well known that the large black ant devour the little red ones and one bright lady introduced several of the big black ants into her home in order that they might eat the little ones up.

The black ants did their work nobly and now the home is free of the small pests.

Since the bright woman made her successful experiment her neighbors frequently run over and ask her for the little black ants and she is always ready to give them a few.

BRECKENRIDGE NEWS.
WEDNESDAY, JULY 6, 1904.
SIX PAGES.

A GREAT OFFER.
Farm Journal From Now to December 1903, Nearly Five Years.

By special arrangement with the publishers of the Farm Journal we are enabled to offer that paper to every subscriber who pays for the Breckenridge News one year ahead, for only \$1, both papers for the price of one only; our paper one year and the Farm Journal from now to December 1903, nearly five years. The Farm Journal is an old established paper, enjoying great popularity, one of the best and most profitable papers published.

Let the good road revival continue.
Gonzales, started in with Stone, but he came away with the whole quarry.

Gov. Stone is one man who does not believe there is honor among thieves.

Good roads are more substantial promoters of prosperity than party platform.

Breckenridge county people will find the farmers' institute more profitable than political conventions.

Of the two, Judas Iscariot was a better man than Goebel, for Judas hung himself after betraying his victim.

If farmers would study the science of agriculture as intelligently as they study politics they would be the most prosperous people on earth.

Gonzales' monomaniac influence over the convention would indicate that he had taken lessons from Elder Hicks, the Hancock county hypocrite.

The power the democracy realize that the politicians care no more for them than they do for the Democratic party, since the better it will be for the country.

When the Democracy of Kentucky surrendered to Bill Hendricks, the Courier-Journal Bryanism received its death blow in the "blue glass case."

It was Jim Todd, of Owensboro, who said: "A good many sprouting politicians will be shipped in the end by the Goebel train during this convention is over." Gus Richardson will tell you that Todd's prediction came true.

Ed Kelley, of Louisville, called Jess Goebel in nomination at the Democratic convention. In his speech, Ed said: "The scent of democracy exudes from every pore of my body." A man standing near said: "He's wrong. It's the odor of mind [nails he refers to]."

THE INSTITUTE.
The Farmers Institute that will be held in this city next month will be one of the most profitable and most interesting meetings of the kind that has ever been held in this state.

Besides General John B. Cantelero there will be other eminent stock breeders and farmers from various portions of the state present to take part in the proceedings.

A meeting of citizens and business men of Cloverport will be called to plan to entertain those who will attend.

Every effort will be made to get a large crowd.

The railroad officials will make arrangements to provide cheap transportation from all points on the road.

Every farmer in this section, no matter what his state or county, should be present as questions will be discussed that will affect his property and will be of vital moment to all.

A cordial invitation is extended. Get in the choir of progress. Listen to the music of enterprise. Be proud that you are a farmer. Consider well the fact that even a poor farmer who makes his living is wiser than the poor lawyer or doctor who has to fight hard to keep from starving.

Study your interests. Listen to the wisdom and experience of men who make a success of their life.

Attend the institute. It will pay you and you will be treated well.

Red Hot From the Gun.
Was the ball that hit G. B. Steadman of Newark, Mich., in the Civil War. It caused terrible injury that has not yet healed for 20 years. Then Buckner's Armies saved him. Come out, Arkansas, Burns, Bull, France, Corns, Rhinoceros, Bums, Bulls, France, Corns, Rhinoceros. But this cure is worth 25 cents a box. Cure guaranteed. Sold by J. H. Hayes, Druggist.

To Philadelphia.
The Breckenridge Asphalt company shipped a car of rock asphalt from the mine at Garfield to Philadelphia last week. The rock has been used as a sample and if the test is satisfactory it will be used exclusively by the city repair plant.

Fair Yield.
The wheat yield on Col. Washington Hott's farm at Hot, is a little heavier than most crops in the bottom. It will approximate 10 bushels to the acre.

Go to the Fair.
Breckenridge county held, early in the week, a fair. It was a success. The fair was held at the fair grounds, near the fair grounds. The fair was a success. The fair was held at the fair grounds, near the fair grounds.

T. G. Jordan and R. D. St. Clair were in the city last week visiting tobacco and looking on the convention.
Having no celebration at home our people will be attracted to various points to celebrate the grand and glorious fourth.
Alta St. Clair gave a birthday party for his anniversary to quite a number of her little friends last week which was highly enjoyed by the little folks.
As long as bar-room bums and irresponsible men supervise the working of our roads the same luxury will continue to afford that now exists with confidence.

Last year the road tax was expended on the best part of our roads, the same thing is being done again this year while the worst part of our roads remain unimproved.
The people of this state should see to it that men are sent to the legislature this year who have some ideas of the needs of our public roads and who will work to secure proper enactment to have them worked.
Somebody ought to be responsible for the working of the hands on our public roads. It is a well known fact that the majority of the road overseers instead of putting in six days work with his hands do not put as much as one day good straight time during the year.

The Farm Journal is a cream, not skim-milk, and just the paper for the man who keeps cows. We give it for the balance of 1904, and all of 1905, 1906, 1907, 1908 and 1909, nearly five years to every subscriber to the Breckenridge News who will pay a year ahead. Walk right up to the captain's office without delay.

Watch these items for the date.
A lady, not a hundred miles from here, was heard to remark, not long since, that she started out with a paper for a good purpose she not only received refusals but actual insults and acts of contempt from "gentlemen." Now these "Brethren" and others, who are in the habit of speaking snappishly to church and other charitable committees should stop and think how they would like the same treatment were they placed in like positions and have the politeness to say "no" kindly when refusal is necessary as the church or charity "organ" as a pleasant position take it at best.

CURRENT TOPICS.

Mr. Harris (Ill.)

Don Radley, of Jeffersonville, is spending the summer with her sister, Mrs. Henry Melin.

Mr. Barton speaks in very complimentary terms of the Irvington entertainment, especially the drill given.

Many are surprised to know that all of Mrs. Abe Lincoln's brothers were officers in the Confederate service. I don't see why. Weren't we all divided and separated by sectional and feeling in families during the war?

Poll Colonels! They are in next to who talk most of the matter. The people who have worked hard in the team must go. The storm has been gathering for some time and now the clouds are breaking the thunder rolls and the lightning flashes. Back life given in these tall ships.

In a "Life Drama" recently enacted before the world there is only one solution; he had lost faith in God and woman, the saddest thing that can befall a soul. This life is at last but a "momentary sparrow flight" between birth and death and to lose faith in two of the richest gems is "to be left upon the mountain top of death."

The Hardin, Stone, Goebel conflict had to be personal almost. Politically they all stood for the same thing. They all preached the same gospel, so it was hard to eliminate the personal equation from the problem. I wonder if we will know in Kentucky whether the state was represented by a Hardin, a Stone or a Goebel? Perhaps Taylor may be in the field and look horse. The question to me has been how the Democratic trio antagonize each other. An anomalous situation!

The cause and cure for crime is a hard one for which to suggest a remedy. Some crimes are provoked by poverty others by extreme wealth. The influence of alcoholism has much to do with crime. Education prevents some crimes but it does seem to favor forgery, false witness and political crimes, in many instances we regret to say. The difficulty to eradicate deeply rooted tendencies to evil takes more than "science brevities" of which we read. Change of environment and "moral training" all fail. The old Adam is hard to scare off.

I am with Senator J. C. S. Blackburn, Senator Brewster and others in denouncing the secret ballot as un-American, un-American like them. I hope our next Legislature will see that we return to the viva voce system of voting as established by our fathers. Let the result of election in Kentucky depend upon the men who cast the ballots and not upon those who count them. The secret ballot is right in some instances, for instance where there is a "Cotton Reed" or business over employed subjects but better forego them than a more dangerous to the liberties of a people.

I am glad for the sake of Isabelle France, that Dreyfus is to be granted another trial. France can now vindicate her honor. She convicted an innocent artillery captain in 1894. The court martial at the new trial will surely acquit Dreyfus. There isn't a shred of proof to be offered against him, and I believed five years ago as now. The documents were all bogus and all the personal testimony false. Col. de Frey-de-Clam, his chief persecutor is in jail. Bismarck has confessed that he forged the famous "bordereau." "Vengeance is mine, saith the Lord." We see it verified in this world. Good for Mrs. Dreyfus, that true, faithful, devoted wife.

The Spanish conquest of the Caroline, Marshall and Ladrones Islands to Germany is a good thing for both parties. Spain never found these islands profitable and now with her other Pacific possessions gone, she is much better off of them.

Germany is pushing her Commercial interests to the end of the earth and she makes them valuable substitutes to her growing Eastern trade. What there the United States should have done though in making peace with Spain, was to have insisted on a sailing station and cable landing in the Caroline because they lie between the Philippines and Hawaii. It is too late now as we have no reason to object to this Spanish-German bargain. Spain once had a world-wide empire. Now only the Spanish peninsula, the Canaries and a small territory in Africa remain of her boasted possessions. It is the closing chapter in the history of a nation whose colonial possessions have been taken from her by the intervention of other powers in the interest of humanity and civilization to put an end to Spanish cruelty and misgovernment.

Congress has invested the President with ample power to deal with the emergency in the Philippines. The wobbly policy of the Administration for popular approval, and stopping to feed the public pulse, is anything but abhorrence of inspiring. I desire to see men who aspire to leadership shrink one single responsibility especially in military. We want no terms but successful surrender, and we know that the Philippine will be dealt with justly in any event, and that they will be regarded according to the best which our citizens can receive and we all know, that they will be given self government, just exactly to the degree that they show themselves capable of it. We want to strike and strike hard, crush opposition, reduce peace, with, guns, for good and all—Increase the force of Gen. Otis, if we are not blind we know it is too small—Let its adequacy be beyond a doubt. I wish I was President for a while, I'd show Aguinaldo and his marauders.

The amending of the civil service rules had been expected for a long time and yet it has stirred up as much comment as if wholly unanticipated. The Democrats seem to regard the President's action as a "backward step." The Republicans do not comment much, but many either express regret or point out features which may result in improved service. I do not profess to be erudite enough to pass for authority, but it seems to me "the door is thrown wide open to the spoilsman." The other affects practically every department except the Department of State and the Navy Department which are untouched. The order of President Cleveland was considered too broad. But now when the problem of governing the United States is just beginning to loom up the order seems a little unfortunate. I for one can hardly see how President McKinley thought a formal order of this kind at all necessary. The bundling of politicians should not be confused with the wish of the people. I am afraid the President has mistaken the one for the other.

While "Cold Water" and the rest of the world are waging war against the alcohol, why not incline toward morphine, opium. It is the abuse, not the use of all these commodities that is pulling down and degrading the human family. Opium is destroying more young men today than whiskey. Statistics bear me out that at Lakeland the asylum has more inmates suffering from mental aberration from the use of opium than from any other cause. All around us, every where homes are wrecked, husbands miserable, children neglected and even brought into the world weeping from mothers using these monstrous drugs to excess. Let lighting be done all along the line. None of us stand for the saloon and the sale of whiskey, but as before said it is recognized as a legitimate business, the revenue enormous. Now if those dealers are to be deprived of a legitimate business then to work and eradicate, legislate and eliminate their other evil. If it is wrong to sell whiskey, why then it ought to be struck and strike hard. Remember though it is the abuse that creates the trouble. If you take one step along in your reform, you open the door to another. If you take away from the sale of merchandise that take away from another the sale of morphine, opium,

BARNEY OF BEST AND PLEASURE. COME ONE! COME ALL! THE GREATEST BARBECUE of the season will take place SUNDAY, JULY 8, 1899 AT JOLLY STATION.

cigarettes and tobacco. Whiskey or alcohol is used largely in the arts, as a medicine, just as morphine is administered as a medicine, but the abuse of it is the trouble. No woman stands for the saloon, no one can. But let it be fought right and if you deprive the saloon keepers of their business, take it from the drug stores and while you are doing that do not forget that every day they are selling, deadly drugs, the abuse of which, like alcohol, is as great a curse and that the vice cigarettes are as poisonous, exert as vicious and as a pernicious an influence as ever whiskey, beer, wine and all the intoxicants put together. Take all this business away from the saliers. Make a clean sweep while you are at it, and take along in your reform, gunpowder which in 1899 as I have found to show has sent more men to untimely graves than any intoxicant. Gunpowder is a magnificent article, we couldn't get along without it until it is abused, then like whiskey, it destroys homes, breaks hearts, deprives children of their homes and creates misery and woe like whiskey, morphine and opium. In crushing one evil make the warfare broad and crush all. If we can save the boys of this age from the misery following the excessive use of cigarettes, I believe we had better begin there.

Our baby has been consistently troubled with colic and cholera infantum since his birth, and all that we could do for him did not seem to give more than temporary relief, until we tried Chamberlain's Colic, Cholera and Diarrhoea Remedy. Since given that remedy he has not been troubled. We want to give you this testimonial as an evidence of our gratitude, not that you need it to advertise your meritorious remedy—G. M. Death of Mrs. Carlton.
Mrs. Lauretta Carlton, aged about 75 years, died Saturday morning at 5:30 a. m. at the home of Ed Ogelsky.
She had been falling since last fall and accepted the inevitable with a cheerful resignation. She knew the end was coming and passed away as peacefully as a child falling asleep.
Mrs. Carlton's maiden name was Cannon. Her brother, Captain Cannon was a famous river man and was known throughout the country as the Master of that peerless floating palace and river greyhound, the Robert E. Lee, whose sinking was a part of the history of the southland.
Mrs. Carlton was married twice. Her first marriage took place when she was seventeen years of age and was dissolved by the death of her husband. She was then united to Mr. Powell, child of the Marguerite, a famous Mississippi river steamer.
Two years after her marriage a tragedy occurred that left her a widow.
The steamer *Marguerite* was scheduled for a race from New Orleans on the river to Natchez with another boat.
A full load of rice was on board and the Pilot Powell was standing at the wheel in the Texas with a watch in his hand waiting for the moment for the start, an explosion of the boilers took place and he was among the killed. His body was found fifteen months afterward in the river delta, fifty miles below New Orleans.
A number of years transpired and the deceased again became a bride. She was married to Captain Carlton, a noted steamboat man whose home was at Hartford. They lived happily together for a few years and she was again left a widow.
Mrs. Carlton was a member of the Methodist church. She possessed a beautiful character and her disposition was so sweet, so sympathetic, that, as one friend expressed it, "she was a woman every one calls aunt."
She made her home all during her widowhood at Ed Ogelsky's. The latter took place Sunday at the Ogelsky home and was largely attended.
Among those present were: Mrs. Black and Mrs. Longest, of Haverhill and Mrs. Marks, of Louisville. The remains were sent to Frankfort Monday morning to be interred beside those of her brother, Captain Cannon.
\$100 Reward \$100.
The reader of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is Catarrh of the Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure acts internally, acting directly on the blood and mucous surfaces of the system, thereby restoring the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietor has so much faith in his curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for literature of testimonial.

HE THREW MONEY AWAY.
A Medicine-dispenser Tosses Nickels To the Rabble.
An Indianapolis, paper, speaking of Dr. L. T. Cooper, a brother of Dr. R. W. Cooper, the Quaker doctor, who is now showing in this city: Dr. Cooper, the medicine man, who throws away money, panned the streets Thursday morning with his nickel slugs. It was a day of a colored man in a tattered, lowly worn two carriage with negroes in stage costume a carriage with two smooth faced men, the doctor's carriage, and a colored orchestra in a carriage. There was plenty of music, and when the brass and string bands were silent, the negroes continued the noise with vigor. The doctor was seated in a long black coach, with gold buttons, and stood in his carriage holding a little satchel that was supposed to contain \$500. The money was in nickels, which the doctor threw away by handfuls.
A crowd of boys followed his carriage, and some that were not boys. The "children feed" would hardly touch the pavement unless at least a dozen wildly screaming for nickel slugs. It was a continuous rough-and-tumble, half-pulling, clothes-rendering squabble that surrounded the liberal physician, where a dollar's worth of damage was done for five cents. At Washington and Madison st., the doctor threw a coin under a street car, which had stopped. The car was nearly pushed from the track by the eager mob and one passenger, a full grown man, with heavy whiskers, looked as if he were trying to claw a hole through the bottom of the car to get at the prize. A large crowd of boys followed the doctor's carriage, and some that were not boys. The "children feed" would hardly touch the pavement unless at least a dozen wildly screaming for nickel slugs. At Washington and Madison st., the doctor threw a coin under a street car, which had stopped. The car was nearly pushed from the track by the eager mob and one passenger, a full grown man, with heavy whiskers, looked as if he were trying to claw a hole through the bottom of the car to get at the prize. A large crowd of boys followed the doctor's carriage, and some that were not boys. The "children feed" would hardly touch the pavement unless at least a dozen wildly screaming for nickel slugs. It was a continuous rough-and-tumble, half-pulling, clothes-rendering squabble that surrounded the liberal physician, where a dollar's worth of damage was done for five cents.
